SUMMARY

Software Engineer with a robust background in back-end development and long-lasting experience with Linux systems. Co-founded Wavelite NKA Haila Technologies Inc., an IoT startup that implements cutting-edge innovations in wireless data transmission. Recognized for analytical expertise and community development, adept at mentoring and driving innovative ideas into practice.

SKILLS

Languages: Shell scripting, GoLang, Perl, Lua, Python, Javascript, C/C++

Development Tools: VScode, Git, Github, Nodejs

Open Source Tools: RabbitMQ, Grafana, OpenStack, Docker, PostgreSQL, MySQL, srsLTE, RspamD, Postfix, Dovecot, Roundcube, etc.

Analytical: mathematical optimization, statistical learning, data analytics, and wireless system design

Research: track record of publications: <https://scholar.google.com/citations?user=FyIV8yoAAAAJ&hl=en>

Hardware: optoelectronic devices, programmable radios, IoT sensors

Soft Skills: collaborating with cross-functional teams, mentoring, planning events, working with volunteers, writing articles

EXPERIENCE

•Software Engineer

11/2020 - present

Tucows Inc

Remote

- developed software plugins, created Debian software packages, and applied security practices for large-scale networked operations.
- supported operations with problem-solving and debugging skills throughout the infrastructure migrations process.
- developed tools for provisioning and statistical back-end, RESTful APIs using Golang, PostgreSQL, PostgREST, and Docker Engine.
- developed and deployed a proof of concept observability platform powered by micro-services, relational databases, and open-source visualization tooling.

•Software Consultant

02/2020 - 11/2020

Chebucto Community Net

Remote

- fully upgraded decades-old web services (Apache), email services (LDAP, Postfix, MailMan3, SpamAssassin, ClamAV), admin UI (PHP, SQL), and wireless services (FreeRadius) for the community network that was maintained by volunteers since 1994.
- migrated 600 subscribed user accounts to work seamlessly with the new services.
- independently completed the transition within 7 months.

•Co-Founder and Tech Lead

03/2017 - 05/2019

Wavelite NKA Haila Technologies Inc

Monreal, Canada

- raised 600K investment fund from TandemLaunch Inc.
- built prototypes as proof of concept for a passive IoT sensor that relies on WiFi signals for its operation.
- paired with a co-founder, recruited a strong and diverse team of engineers.
- received several research grants that supported aspiring university interns for collaborations with the startup. Welcomed young school students for summer internship opportunities.
- pitched and promoted the project globally at events such as CES, Taiwan's Garaga+, CDL Lab at Toronto University, Quebec's Chamber of Commerce alliance in China, etc.
- project was highlighted by RFID journal and received the CES Eureka Park's climate change award in 2018.
- together with the co-founder locked in a development contract with a major home automation company based in Germany.

•Visiting Scholar

09/2016 - 03/2017

MIT

Cambridge, USA

- actively contributed to the design and the initiation of new research projects in the Sensable City Lab, namely Philips smart lighting and the city scanner projects.
- contributed to applied research at CSAIL to develop synchronization algorithms suited for large-scale LTE networks. The results demonstrated $2.7\times$ throughput improvement over traditional synchronization methods.

•Research Fellow

11/2015 - 09/2016

Trinity College Dublin

Dublin, Ireland

- designed and deployed experiments to evaluate the impacts of network delay on LTE and WiFi links. The results provided new insights into the design of future multi-path TCP schedulers.
- designed lightweight recommendation systems for automatically selecting the WiFi APs based on previous training data and in a privacy-preserving manner.
- performed research on distributed optimization methods for network utility optimization and auction algorithms.

•PhD Fellow

08/2012-08/2015

Nokia Bell Labs

Dublin, Ireland

- proposed mathematical models for solving resource allocation problems in 5G access networks.
- applied machine learning models, data analytics, and distributed optimization algorithms to solve such problems. This resulted in a total of 6 conference and journal publications with a total of 78 citing.
- used simulations, statistical analysis tools, and real-world experiments for data collection and evaluation.

•Engineer

02/2010 - 08/2012

Oclaro Inc NKA Lumentum

Paignton, UK

- improved the existing C# based test automation suit with additional features and test cases.
- performed laboratory tests for product specification verification, and prepared reports that were further used for creating product specifications.
- contributed to research on using optical lasers in wind turbine array sensing applications. This solution resulted in a significant reduction in inventory complexity and associated cost of installation and operation, as well as a high degree of measurement accuracy comparable with existing systems.

GRANTS AND FUNDING

•25K CAD grant in collaboration with Dalhousie University

08/2018

to design integrated circuits for ultra low-power RF energy detection.

awarded by NSERC Canada

•60K CAD university-industrial partnership grants

05/2017, 10/2017

created internship opportunities for graduate students.

awarded by mitacs Canada

•25K CAD grant in collaboration with Polytechnique Montreal

11/2017

created a graduate student internship opportunity to evaluate low-power digital design techniques. awarded by NSERC Canada

•600k CAD investment fund

07/2017

funded by TandemLaunch Inc

•Computing Research Association travel grant

10/2016

awarded by Mobicom, ACM SIGMOBILE

•N2 Women Young Researcher Fellowship

02/2015

supported by Microsoft Research and HP labs.

•Full PhD scholarship

08/2012 - 08/2015

awarded by Hamilton Institute and Nokia Bell Labs

ACADEMICS

PhD in Computer Science (network mathematics)

08/2012 - 09/2015

thesis: Resource Allocation for Next Generation RANs

GPA: NA

MSc in Telecommunications and Information Systems

09/2008 - 11/2009

thesis: Novel video Streaming over IEEE 802.16 Networks.

GPA: 87/100, Graduated with Distinction

awarded Telecom Technologies Prize for outstanding performance.

BSc in Electrical Engineering

09/2003 - 10/2007

minored in Communications Engineering

GPA: 17.53/20

ranked 1st among communications engineering students

COMMUNITY

•Service d'Entraide Saint-Romuald, Volunteer

06/2022 - present

Neighbourhood support services

•Women of the Middle East and North Africa in Tech, Montreal, Team lead and co-founder

05/2018 - 10/2020

Team lead of the Montreal's chapter, organizing career fairs and ongoing monthly events

•AI for Social Good, summer school, Lecturer and Mentor

06/2018 , 06/2019

Giving workshops and mentoring young selected students across Canada

•Crowd2map Tanzania, Volunteer

01/2018 - 11/2018

Crowd mapping rural Tanzania, to fight FGM

•NetLab, Trinity College Dublin, Organizer

11/2015 - 08/2016

Coordinated weekly seminar series at the School of Computer Science and Statistics, Trinity College Dublin

•IEEE conferences and Journals, Volunteer Reviewer

11/2012 - 06/2019

Reviewer and program committee member for leading conferences and journals in wireless networking
